It is a remarkable thing that the more mixed a race is the greater its productions in civilization. It is precisely – I, an American, speak with reverence and not boast – because our own great country, the United States, has become the human vital alembic of our days, that its incomparably glorious future lies before it, genius pouring into it from all the corners of the earth; so that the American people of the future will be, as it were, the seeds possessing within themselves strains of capacity, young capacities containing strains of genius, drawn from all quarters of Mother Earth. **If you wish a race to die out and become degenerate rapidly, isolate it,** and you will see it weakening physically and mentally; because imbodying egos do not seek imperfect vehicles; they are seeking the richest, the fullest, the most complete that they can find. (...)

A race dies out, Companions, when egos magnetically sense a disinclination to incarnation in the bodies born in such peoples. The women become sterile. The men likewise. For the egos will not imbody in them. That is why old peoples die out, peoples, mark you, which in their own day may have been the guides and leaders of the earth.

*The Esoteric Tradition*, Vol. 1, pp. 518-519

A man simply cannot, by Nature's own laws, long live unto himself alone; and it is because so many millions of unwise and ignorant men try to live so, that there is so much misery and unhappiness in the world. History shows us that men have been great precisely in proportion as they have forgotten themselves, and lived for the world. This is obvious because the great men have a great field of view and rest never content until they enter upon these greater fields of vision. The man who lives for himself alone has an extremely limited and restricted vision, and all

too soon finds that most other men have the same limited and restricted field of vision, and thus there arise constant jarrings and conflicts and the pathetic entanglements of destiny which often so wring the heart. It is the great men who embark upon great courses because their vision is great, and it is the small men, because of their ignorance and foolishness and restricted vision, who try to separate themselves off into a little corner of selfhood there to live for themselves in ignoble isolation. Nature will not long tolerate it.

## Gottfried de Purucker on the Sun as heart and brain of its system, sending pulsations through earth

*Esoteric Teachings*, Vol. 7, 'The Doctrine of the Spheres', pp. 18-19 (1st edition, 1936); pp. 37-38 (I.S.I.S. edition, 2015)

As the heart and brain of its entire system, the Sun sends a twelve-faceted life into every atom of its own universe, the Solar Universe of which we form an integral part. The Sun is pre-eminently and essentially a giver of life. Cosmogonically, it is our Elder Brother, and not at all our physical parent as modern scientific speculations would have it; yet it is also in a vital sense our Father-Mother, because through the Sun, from planes superior to our own, come down the invigorating life-streams from systems and worlds above ours; and our planet Terra, as all the other planets, receives its own share of these life-streams, precisely as every individual atom and every entity, on the microcosmic scale, receives also a portion of these life-giving streams, while, at the same time receiving them individually from the Inmost of the Inmost within itself. The Sun is a storehouse of vital-electric energies, vitalizing and informing the endless hosts of beings under its systemic sway, as the great pulsating heart of its system.

Could we see the human heart and watch its vital functioning on another plane, we would see what would appear to us, unless we understood what it was, as a vibrating globe of light, beating with rhythmic regularity a certain normal number of beats per minute of human time.

The sun-spot cycle, as a cycle, is due to the same forces which make the sun-spots themselves. The sun sends forth from itself through these spots currents of psycho-magnetic vitality throughout the entire solar system; and through these spots it receives back the blood, the solar blood, the psycho-magnetic energy, on its return — to be cleansed, purified, in the deep recesses of the solar orb.

As pointed out by H. P. B., in one of the most illuminating passages from her pen:

... there is a regular circulation of the vital fluid throughout our system, of which the Sun is the heart — the same as the circulation of the blood in the human body — during the manvantaric solar period, or life; the Sun contracting as rhythmically at every return of it, as the human heart does. Only, instead of performing the round in a second or so, it takes the solar blood ten of its years, and a whole year to pass through its *auricles* and *ventricles* before it washes the *lungs* and passes thence to the great veins and arteries of the system.

This, Science will not deny, since Astronomy knows of the fixed cycle of eleven years when the number of solar spots increases, *which is due to the contraction* of the Solar HEART. The universe (our world in this case) breathes, just as man and every living creature, plant, and even mineral does upon the earth; and as our globe itself breathes every twenty-four hours. ... It is similar to the regular and healthy pulsation of the heart, as the life fluid passes through its hollow muscles. Could the human heart be made luminous, and the living and throbbing organ be made visible, so as to have it

reflected upon a screen, such as used by the astronomers in their lectures – say for the moon – then every one would see the sun-spot phenomenon repeated every second – due to its contraction and the rushing of the blood.

### Gottfried de Purucker on Terrestrial Magnetism

*Esoteric Teachings*, Vol. 7, 'The Doctrine of the Spheres', pp. 32-33 (1st edition, 1936); pp. 54-55 (I.S.I.S. edition, 2015)

Please remember that the Earth is a magnet. It is constantly infilled with the solar energies streaming continuously from our own day-star through the Sun's realms, which comprise the entire solar system. Hence the magnetism of the Sun enters the Earth at its North Pole, or, at any rate, in the region of the North Pole. **This magnetism is septenary**, strange as this may sound to modern minds, schooled as they are in the ideas of scientific teachings of the day. **Certain elements of this solar magnetism pass directly from Pole to Pole through the center of the Earth, but other parts of the solar magnetism sweep around or over the surface of the Earth, but always from the North Pole southwards to the South Pole.**

### Mahatma K.H. on Man as the buddhi principle of the Globe (Earth)

*The Mahatma Letters to A.P. Sinnett*,

Letter No. 15, p. 94 (Barker edition); Letter No. 67, p. 185 (Chronological edition)

The correspondence between a mother-globe and her child-man may be thus worked out. Both have their seven principles. In the Globe, the elementals (of which there are in all seven species) form (a) a gross body, (b) her fluidic double (*linga sariram*), (c) her life principle (*jiva*); (d) her fourth principle *kama rupa* is formed by her creative impulse working from centre to circumference; (e) her fifth principle (animal soul or *Manas*, physical intelligence) is embodied in the vegetable (in germ) and animal kingdoms; **(f) her sixth principle (or spiritual soul, *Buddhi*) is man** (g) and her seventh principle (*atma*) is in a film of spiritualized *akasa* that surrounds her.

### Gottfried de Purucker referring to the above statement of Mahatma K.H.

*Esoteric Teachings*, Vol. 9, 'Correlations of Cosmic and Human Constitutions', pp. 46-47 (1st edition, 1936); pp. 71-72 (I.S.I.S. edition, 2015)

A few words may be helpful here with regard to the statement elsewhere made by me that we as humans are higher evolutionally than is our Globe D, our Earth, on which at present our Human Life-wave is stationed. I have elsewhere tried to throw some light on this matter, which seems quite needlessly to have perplexed some of our esoteric students. Now I would not say that we as individual human beings are higher than the Planetary Spirit of Globe D is, for this would be

quite wrong, and I do not think that I have ever used such words – at least I hope not – which would give this entirely erroneous impression. The truth is that the Spirit, or spiritual parts of the Planetary Spirit, of Globe D is higher in evolution than is the Spiritual Monad of any human being, but we human beings as such are higher, and obviously so, than is our Globe D or Earth which is the outermost or most material veil or garment of Globe D's Planetary Spirit. Therefore I may say that the human hierarchy, the human race, represents a rather more evolved stage on the ladder of life than has been attained by the Earth on which we live. And why? Because we are the manifestations at the present time, in quasi-astral, almost gelatinous bodies, of life-atoms of a spiritual type, which stage the globe, considered as an entity, has not yet attained. Human beings collectively, rather than distributively, represent the buddhi-mānasic quality of the Earth.
